SUMMARY

Master's student in Biochemistry and Molecular Biology at the University of Chittagong with a strong academic record and research experience in molecular biology. Current research focuses on agarwood formation in *Aquilaria malaccensis*, including PCR-based gene- expression work. Practical experience includes RNA extraction, RT-PCR, and fungal culture. Interested in molecular mechanisms, gene regulation, biomedical research and further research training.

EDUCATION

Master of Science (M.Sc.) in Biochemistry and Molecular Biology — 2026-Expected 2027
University of Chittagong, Bangladesh | Thesis/research work ongoing

Bachelor of Science (B.Sc.) in Biochemistry and Molecular Biology — May,2021- May, 2024
University of Chittagong, Bangladesh. — CGPA: 3.84/4.00
Passing year: 2026

RESEARCH INTERESTS

Molecular biology; gene expression and regulation; plant stress and defense responses; molecular signaling; immunology; PCR-based analysis.

RESEARCH EXPERIENCE

Research Assistant

Laboratory of Molecular & Structural Immunology, University of Chittagong.

- Contribute to laboratory research in molecular biology and related experimental workflows.
- Perform RNA extraction and RT-PCR for gene expression studies.
- Participate in project investigating the molecular mechanisms associated with agarwood formation in *Aquilaria malaccensis.*
- Organize experimental observations and assist with gene expression results.

RESEARCH PROJECT

Innovation of High-Quality Agar Resin Accumulation Technology in *Aquilaria malaccensis*

Supervisor: Mohammad Monirul Islam | University of Chittagong

- Investigate candidate genes potentially associated with agarwood induction.
- Use PCR-based approaches to study gene expression patterns.
- Examine expression trends that may help distinguish early and later phases of the induction response.

TECHNICAL SKILLS

Molecular Biology	RNA extraction; RT-PCR; PCR-based gene expression analysis
Microbiology	Fungal culture; relevant microbial laboratory procedures.
Research	Literature review; experimental record keeping; data organization; scientific interpretation.
Software/tools	Microsoft Office; Zotero.

AWARDS & ACIEVEMENTS

Thesis Research Scholarship

Research and Publication Cell, University of Chittagong | 2026

Research funding awarded to support master's thesis work.

Academic Excellence

B.Sc. in Biochemistry and Molecular Biology | CGPA; 3.84/4.00

Ranked 1St in class.

TRAINING & PROFESSIONAL DEVELOPMENT

Molecular Genetics Course Participant

Scienspur | 2024

Participated in a course on Molecular Genetics to strengthen knowledge of genetic principles and molecular biology.
